

Built Around How You Actually Work.

When off-the-shelf cannot carry your workflow, we engineer one that does.

Mejona Technology LLP

Fixed-price or dedicated-team · Free discovery and scoping

When custom is the right call

Custom engineering is expensive and slow when used for the wrong reason. It is essential when:

- Off-the-shelf products cover less than 60% of your workflow
- Your differentiation depends on a unique data moat or proprietary process
- Compliance or regulated data requires a specific architecture
- Multiple legacy systems need to be unified without forcing data migration

Engagement models

Model	Best for	Commitment
Fixed-price	A scoped build with clear acceptance criteria	Statement of work
Time-and-materials	Discovery then iterative delivery	Monthly retainer
Dedicated team	Continuous roadmap with your product owner	Quarterly

How we work

1. Free 30-minute discovery call to understand the problem
2. One-week paid scoping — architecture sketch, milestones, fixed price
3. Bi-weekly demos, transparent burndown, working code from week one
4. Operational handover with runbooks, dashboards, and on-call rotation

Get started

Send us a one-paragraph description of what you want to build. We will respond within one business day with whether we can help and what the next step looks like.
